🔧 Professional Profile

Electrical engineer with over 12 years of specialized experience in the **modernization and retrofit of CNC metalworking machines**, including turning, milling, boring, vertical lathes (carousels), surface grinders, and rotary grinders.

Founder of **Skazem CNC** and **Rayan Mechatronic Yazd**, with deep expertise in:

- Installing **Siemens SINUMERIK** controllers
- Upgrading automation systems
- Replacing AC/DC drives For Spindle Motors
- Converting manual machines to CNC

⚙️ Core Services

- Complete electrical overhaul of worn-out CNC machines
- Siemens controller installation and configuration
- Servo system and AC/DC drive replacement
- Preventive maintenance program development
- Siemens-based CNC troubleshooting training
- Manual-to-CNC conversions (up to 5 axes)

🎯 Why Work With Me?

With complete command of legacy **SINUMERIK** CNC platforms, I deliver **fast, precise, and cost-effective** solutions to restore industrial machinery.

In the post-sanctions environment, I offer a **reliable, local alternative** to European retrofit suppliers.
